

CONCENTRATES

Concentrates are potent extracted oils that can have a variety of consistencies. The extraction process determines the consistency with then determines the name. To use a concentrates you will need a concentrate pen or vaporizer.

VAPORIZER EXAMPLES

Ceramic
Coil

Double
Quartz Rod

Quartz
Banger

Vaporizer

HOW TO USE

- Load product into your choice of vaporizer, heat, and inhale vapors for 1-2 seconds. Remove vaporizer from mouth and continue to breath in fresh air, then exhale normally. **PRO TIP:** The inhale should be similar to a sip through a cocktail straw, light and short!
- Effects felt within 0 to 10 minutes and last as long as 2 to 3 hours
- Full effects felt at 5 to 10 minutes, wait 10 minutes before taking another dose
- Take note of how many doses you need; this will help you adjust the initial dose when medicating.

PROS & CONS OF CONCENTRATES

- Since the concentrates are highly potent you will need smaller doses which can be more cost effective.
- Due to the high potency, concentrates can be easy to over medicate on.
- Loading & using concentrate vaporizers is an involved process & can be messy.

Different forms of concentrates are listed below. As you can see, concentrates come in a variety of textures for you to choose from.

CRUMBLE

Dried oil with a honeycomb like consistency and visual appearance.

BADDER/BUDDER

Concentrates whipped under heat to create a cake batter-like texture.

SHATTER

A translucent, brittle & often golden to amber colored concentrate made with solvent

CRYSTALLINE

Isolated cannabinoids in their pure crystal structure.

DRY SIFT

Ground cannabis filtered to leave behind complete trichomes. Also referred to as "kief".

DISTILLATE

Refined cannabis oil typically free of taste, smell & flavor; the base of most edibles & cartridges.

ROSIN

End product of cannabis flower being squeezed under heat and pressure.

BUBBLE HASH

Uses water, ice & screens to pull out whole trichomes into a paste-like consistency.
